The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
Responsive to communication(s) filed on 2a) ☐ This action is FINAL.						
Disposition of Claims	•					
4) ☐ Claim(s) 1-12 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) ☐ Claim(s) is/are allowed. 6) ☐ Claim(s) 1-12 is/are rejected. 7) ☐ Claim(s) is/are objected to. 8) ☐ Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9)☐ The specification is objected to by the Examine 10)☒ The drawing(s) filed on 23 February 2004 is/are Applicant may not request that any objection to the Replacement drawing sheet(s) including the correction 11)☐ The oath or declaration is objected to by the Examine 11.	e: a)⊠ accepted or b)⊡ objected drawing(s) be held in abeyance. See on is required if the drawing(s) is obj	e 37 CFR 1.85(a). ected to. See 37 CFR 1.121(d).				
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.						
Attachment(s) 1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 2-23-2004.	4) Interview Summary Paper No(s)/Mail Da 5) Notice of Informal Pa

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites the limitation "the lower punch about axis thereof" in lines 5 and 6. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4-7,11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhu et al. (6,197,129). Zhu discloses a method and apparatus for working a metal material (12) wherein front and rear convex-concave surfaced dies (20) are used to press the material and generate plastic strain in the material. In column 3, lines 3-7 Zhu discloses that the material is then pressed by flat dies in a second press step. Zhu discloses that the material has a thickness of ½" (6.35mm). Regarding claims 6 and 7, from Figure 1 it appears that the pitch and cross section of the convex-

Application/Control Number: 10/782,759

Art Unit: 3725

concave surfaces of Zhu are approximately equal to (or larger) than the thickness of the material. Regarding claim 12, Zhu discloses dies (28) that are rotatable about an axis.

Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishiguchi et al. (JP 63-235037). Nishiguchi discloses rotary front and rear dies (1,3) which press a metal material (2) in figure 2.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zhu et al. (6,197,129) in view of Adams et al. (6,502,447). Zhu does not disclose aluminum, Zhu broadly discloses a metal or metal alloy. Adams teaches (column 4, lines 36 and 37) that it is known to shape steel, brass or aluminum with convex-concave shaped surfaces. It would have been obvious to form other materials in Zhu as taught by Adams in order to produce improved materials of varying composition.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhu et al. (6,197,129) in view of Gerich (3,748,888). Zhu does not disclose that the convex-concave shaped surfaces diverge from an axis at an angle. Gerich teaches (figures 4 and 7, column 7, lines 2-5 and 10-14) that it is known to use convex-concave surfaces (38,43,73,74) to provide tapered shapes (28) in a material. Gerich teaches that an angle of the surfaces is selectable to produce a depth (x). It would have been obvious

Application/Control Number: 10/782,759

Art Unit: 3725

to one skilled in the art at the time of invention to provide Zhu with convex-concave shapes as taught by Gerich in order to produce differing corrugation patterns.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
